

KAUSHAL G

AI/NLP Engineer | Data Analyst | Python & LLM Specialist

Bengaluru, India | 748-348-1812 | kaushalg718@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year BCA graduate from AIMS Institute with a focused specialization in AI/NLP engineering and data analytics. Built real-world systems — from LLM pipelines to Power BI dashboards — across two internships and multiple independent projects. Passionate about responsible AI, structured data design, and turning messy datasets into decision-ready intelligence.

PROFESSIONAL EXPERIENCE

OCTANET Pvt Ltd, Bengaluru

Feb 2025 – Mar 2025

Python Data Integration Intern

- Developed **Python AI/NLP pipelines** using OOP and structured exception handling, improving system uptime by **15%** with full data-flow traceability.
- Built **ETL workflows** with **Pandas and NumPy** across SQLite and MySQL, cutting processing time by **30%** through advanced SQL query optimization.
- Implemented **schema-driven extraction** and normalization routines for incoming data feeds, enforcing **data quality standards**
- Automated **regulatory validation workflows** with **human-in-the-loop checkpoints**, eliminating 20+ hours per week of manual compliance effort.

PEENYA INDUSTRIES, Bengaluru

Jun 2024 – Aug 2024

Data Analytics Intern

- Engineered a comprehensive data preprocessing framework to ingest and clean high-volume, multi-industry unstructured datasets, utilizing advanced **feature engineering**, **dimensionality reduction**, and text-parsing techniques to isolate high-signal predictive variables. Conducted granular exploratory data analysis and predictive pattern modeling to successfully identify, validate, and score high-propensity lead generation opportunities previously hidden within latent market data. Directly accelerated business growth by expanding the aggregate sales pipeline volume by **10%**, delivering highly optimized, data-backed insights that strategically guided cross-functional teams in executing targeted B2B outreach strategies.
- Developed and trained a **predictive model** for industry demand shift forecasting, integrating historical trends and market signals to generate forward-looking insights with **20% improved planning accuracy**. Delivered findings through structured, audit-ready documentation
- Delivered deep-dive analysis using **advanced SQL/T-SQL and Excel** on complex industrial datasets, enabling independent **data validation**.

PROJECTS

ANATOM – AI-Ready E-commerce Platform

Apr 2025 – Jun 2025

Flask, Django, MySQL, PostgreSQL, REST APIs, Python

- Architected a **Flask/Django full-stack application** with **schema-driven persistence** and ETL pipeline design, cutting backend query latency by **40%**.
- Engineered a secure **audit-trail backend** for concurrent transactions, achieving **100% data integrity** and full traceability across all operations.
- Designed structured **REST API integrations** with **deterministic output formats**, applicable to enterprise Spring Boot platform workflows.

Job Market Intelligence Dashboard

Jul 2025 – Present

Python, Selenium, Scrapy, PostgreSQL, SQLite, Pandas, NumPy, Power BI, GitHub Actions, Render

- Architected a robust, multi-source ETL pipeline using **Selenium** and **Scrapy** to programmatically ingest over 50,000 live job listings from Naukri, LinkedIn, and Indeed. Designed a highly normalized relational database schema to eliminate data redundancy and ensure strict data integrity across disparate, unstructured web sources. Implemented robust error-handling, custom middleware, and rotation policies to handle anti-scraping
- Optimized **analytical SQL queries** across PostgreSQL and SQLite, delivering sub-second response times on **50,000+ records**.
- Extracted KPI metrics (**skill frequency**, **hiring patterns**) using Pandas and NumPy; visualized insights in a **Power BI dashboard** with dynamic filters.
- Deployed production pipeline to **Render via GitHub Actions CI/CD**, with **environment configuration** and automated deploys following practices.

SKILLS

Languages: Python (Advanced), SQL/T-SQL, JavaScript (working knowledge), Java (familiar), C++ (familiar), Bash/Shell, RAG

AI / ML: Large Language Models (LLMs), NLP, Prompt Engineering, Structured Output Design, Predictive Modeling, Feature Engineering, Scikit-learn

Frameworks: Flask, Django, REST APIs, Fast API, Pandas, NumPy, Selenium, Scrapy, Matplotlib, Seaborn

Data & ETL: ETL/ELT Pipeline Architecture, PostgreSQL, MySQL, SQLite, MongoDB (familiar), Data Quality Management, Normalization, Data Warehousing

Governance: Responsible AI, AI Governance, Compliance-to-AI Design, Human-in-the-Loop Validation, Auditability Frameworks

Tools: Power BI, Advanced Excel (Pivot Tables, VLOOKUP, Macros), Git, GitHub, GitHub Actions, Docker (familiar), Render, Linux

EDUCATION

AIMS Institute, Bengaluru

Aug 2022 - Jul 2025

BCA Bachelor of Computer Applications

CGPA: 7.29 / 10

CERTIFICATIONS

- TCS ION Young Professional (AI & Digital Literacy)
- Git & GitHub – Open Source Workflow Certification
- Python Programming – Solo learn Certification
- Prompt Engineering & LLM Fundamentals (Self-Study)
- Responsible AI & AI Governance Principles
